Signal strength curves depending on the distance

1 Object distance [m]

- 2 Signal strength
- 3 Retro-reflector film
- 4 White surface

The figure shows a typical curve of the signal strength transmitted by the safety sensor as a function of the measured object distance and object diffuse reflection for the following boundary conditions:

Angle of incidence of the laser beam: 0°

• Share of area of the light spot on the object: 100%
