Typ. black/white behavior

- x Range [mm]
- y Reduction of range [mm]
- A White 90%
- B Gray 50%
- C Gray 18%
- D Black 6%

Fading: black/white error < 50 % The black/white error is calculated from the operating range against white and the reduction of the operating range against black: black/white error = reduction of the operating range against black / operating range against white x 100%

Notes

Observe intended use!
^t This product is not a safety sensor and is not intended as personnel protection. ^t The product may only be put into operation by competent persons. ^t Only use the product in accordance with its intended use.

For UL applications:

♦ Only for use in "class 2" circuits

These proximity switches shall be used with UL Listed Cable assemblies rated 30V, 0.5A min, in the field installation, or equivalent (categories: CYJV/ CYJV7 or PVVA/PVVA7)

Further information

- + Sum of the output currents for both outputs, 50 mA for ambient temperatures > 40 $^\circ\text{C}$
- With the set scanning range, a tolerance of the operating range is possible depending on the reflection properties of the material surface.
