Technical data

Basic data

Description	"Extended" stopping time measurement on a safety-related sensor with service agreement.
Details	Performed if a safety-related sensor safeguards multiple hazardous movements, e.g., an assembly machine with multiple crushing or shear points that are simultaneously safeguarded by a light curtain.
Conditions	It must be possible to stop the machine, support provided by customer's employees and access to the machine for Leuze employees must be ensured.
Restrictions	Perform 10 measurements, evaluate in accordance with ISO 13855:2010, appendix D.
